The Thrift of a

MAXWELL

comes from its special steels

Nearly 400,000 owners know well how thrifty a Maxwell really is.

Men in the trade in selling other cars often use the expression "as thrifty as a Maxwell."

Special steels are the underlying cause of Maxwell's thrift.

These are steels, made to Maxwell's own formulae, after years of tests, analysis and study, which make possible the ideal construction of great strength and light weight.

They give a Maxwell the

ability to stand wear, strain, twists and jolts that other cars much larger and heavier would have difficulty to resist.

But they make a Maxwell light. They eliminate useless weight; they case the burden on the engine and thus gas, oil and tires render long mileage results.

Hence, the ever growing respect and admiration for Maxwell the world over; and its consequent fast growing numbers. Nearly 400,000 in use today; a year hence 500,000.

What Is "Safe" Investing? The difference between sare investing and unwise investing is- and more often than anything else-the difference between knowledge and lack of knowledge of what is behind a seeurity-what it does NOT offer quite as much as what it does offer.

The investigation of these features, in a THOROUGH way, is usually beyond the facilities of the average investor, sometimes beyond his experience. Our Statistical Department is most complete, and our Service Department is open to all investors who seek fair and unbiased advice-who wish to safeguard their money by investigation beforehand, rather than after-
